

DRAFT INDUCER CROSS REFERENCE GUIDE

FOR FURNACES AND WATER HEATERS
THE REPLACEMENT MOTOR AND BLOWER SPECIALISTS

ABOUT DRAFT INDUCED BLOWERS

Many of the new energy-efficient gas furnaces use induced draft blowers to control flue gas. All induced draft blowers incorporate some type of signaling device to alert the furnace that the induced draft blower is operating. Some use a sail switch in the exhaust air stream. Others utilize a centrifugal switch or electronic sensor built into the motor, and some use a static pressure tap in the blower housing. All blowers are intended to provide air flow prior to ignition.

In today's furnace industry, draft inducers are becoming a common replacement part. Since these furnaces are being designed with specific induced draft blowers, it is very important to use exact replacements matching the original blower for safety reasons.

These blowers play an important part in controlling the availability of gas to the burners. Most blowers will employ either a centrifugal switch, electronic sensor, or a vacuum tap to generate a signal to the gas valve that the induced draft blower is operating. This feature is necessary to prevent the gas valve from being turned on prematurely or in the event the blower does not operate properly.

These blowers control the removal of the burnt by-products. Therefore, only replacement blowers made for specific furnaces or water heaters should be used for these replacements. The following paragraph describes why.

The blower is designed to produce a certain amount of air-flow measured in CFM (cubic feet per minute). The airflow in some furnaces is needed to create a specific amount of vacuum at the vacuum tap mentioned above. If the replacement blower is not the exact one needed but "looks close," it may produce a lesser vacuum at the vacuum tap. This may not allow the furnace to operate since the furnace will not think the induced draft blower is operating.

Locate the OEM part or model number on the draft inducer you need to replace and use this simple guide to find the FASCO® direct replacement draft inducer. Every effort has been made to ensure the accuracy of this reference guide. Design changes may result in different operating characteristics or dimensional changes from one manufacturer to another. Therefore, Regal cannot accept responsibility for the ultimate selection. Always compare draft inducers for interchangeability prior to installing or recommending their use.

Trademarks and trade names of OEMs are not owned or controlled by Regal Beloit Corporation unless such ownership is expressly claimed on the back cover. The rights associated with those trademarks and trade names remain the property of their respective owners or licensees.

APPLICATION CONSIDERATIONS

The proper selection and application of products and components, including paying full attention to the subject of product safety in the application, is the responsibility of the customer. Operating and performance requirements and potential associated issues will vary appreciably depending upon the use and application of such products and components. The scope of the technical and application information included in this publication is necessarily limited. Unusual operating environments and conditions, maintenance requirements, installation configurations, and other factors can materially affect the application and operating results of the products and components and the customer should carefully review its requirements. Any technical advice or reviews furnished by Regal Beloit America, Inc. or its affiliates ("Regal") with respect to the use of products and components is given in good faith and without charge. However, Regal assumes no obligation or liability for the advice given, or results obtained, all such advice and reviews being given and accepted are at the customer's risk.

For a copy of our Standard Terms and Conditions of Sale, Limited Warranty, and Limitations of Liability and Remedy, please contact Customer Service at 1-800-672-6495 or the website address: <http://www.regalbeloit.com> (link to "Terms and Conditions of Sale" at the bottom of the page). These terms and conditions of sale, disclaimers and limitations of liability apply to any person who may buy, acquire or use a Regal Beloit America Inc. product referred to herein, including any person who buys from a licensed distributor of these branded products.
