

Control Board Circuit Breaker

The POP3 or POP5 provide a temporary emergency fix for control boards that continue to blow fuses or that are shorted out.

Features

- Two common sizes to choose from: 3 or 5 amp.
- Includes quick setting thermal cut out.
- Self-adhesive backing for easy temporary installation.

Benefits

- Keeps homeowner and or building owner up and running with no inconvenient down time until the original control board can be replaced.

Product Information

| Part Number | Description |
|-------------|-------------------------------------|
| POP3 | 3 amp control board circuit breaker |
| POP5 | 5 amp control board circuit breaker |

Applications

- Gas Fired Equipment
- Furnaces
- Roof Top Units
- Boilers
- Unit Heaters
- Water Heaters
- Pool Heaters
- Hot Tubs
- Fireplaces

Tech Tip

- Supco recommends to use the Li'L Popper as a “**temporary fix**” only, until the original control board can be replaced.
- Use the Supco **SmartTester** to troubleshoot heating system problems.

Quick Installation

- Remove blown fuse and plug Li'L Popper into the fuse receptacle on the control board.
- Simply push the button to reset the control board.
