

NURO[®] Control

SVF 7" Color Touchscreen Control System

The Nuro Controller puts you in command of your heating system with easy installation, enhanced boiler diagnostics and remote monitoring capability.

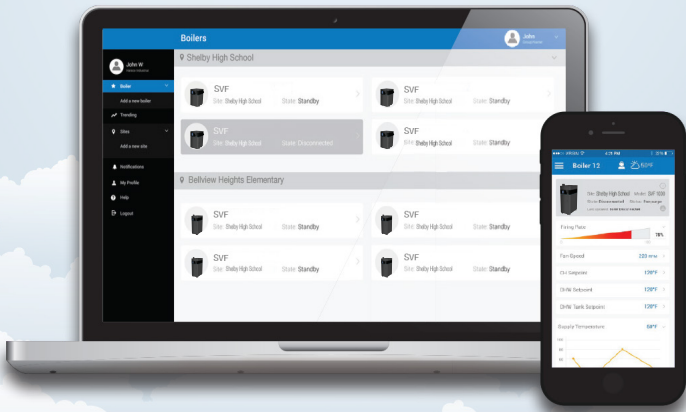

- Easy to read and operate 7" color touchscreen interface
- Controller enabled boiler modulation matches outlet temperature to system target for lowest operating costs
- Customizable night setback and 7-day schedule for seamless integration into boiler management systems
- Real time visual alarms with diagnostic and troubleshooting tips
- Import and export parameters help reduce set up time and enable strong multi-boiler communication
- Before and after event data logging and error trending speeds up problem identification and resolution

Access
Control
Monitor
Modify
Anywhere. Anytime.

Remote monitoring and optimized operating efficiency through your desktop, Android or iOS devices are just a touch away with NURO Connect!

Easier

Simple, easy to understand touchscreen technology adjusts boiler controls with a swipe of the finger for consistent and efficient operation and maintenance.

Better

Intuitive software provides an enhanced user experience so you can refine control settings to your specifications and easily see the effects of your adjustments with a real-time visual analysis.

Smarter

Accessible by mobile or desktop devices, NURO offers a smarter way to monitor and manage your boiler system.
